EMULSION COMBUSTION

NONOX EMULSION-COMBUSTION SYSTEMS MV TARAGO PROJECT MARCH 2013

Wallenius Wilhelmsen Shipping chose the Nonox Model 1100 to accompany the installation of the world's largest ship borne scrubber. The system was installed in Singapore, has DNV approval, and will be commissioned at sea in May of 2013.

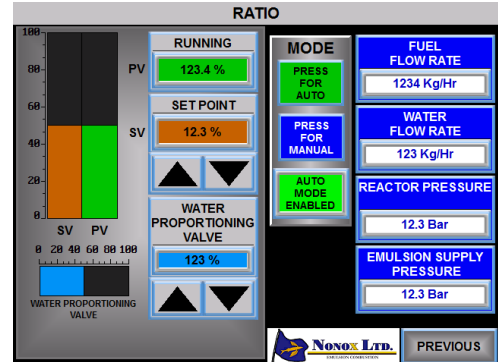

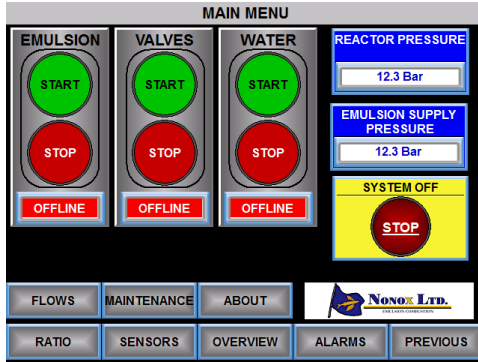

MV Tarago

Placement of New Scrubber

Nonox Unit Installation
Simple Self Contained Unit
Requiring Minimal Space

Fail-Safe automated design operated with a touch screen interface from the comfort of the engine control room

- Greatly reduced soot and carbon problems associated with slow steaming
- Reduced soot and particulates greatly enhance the performance of the turbochargers and economizers
- Potential lower port fees due to significant emissions reductions
- Better atomization of fuel resulting in decreased consumption
- Greatly reduced work load for scrubbers and post combustion devices
